How to install the library

You can download the library from: https://github.com/nryoung/algorithms

Or you could follow the steps to install the library in the command line window:

- Step 1: Open up a command line window

- Step 2: Type in "git clone https://github.com/nryoung/algorithms.git"

- Step 3: Type in "$ pip install algorithms"

Done.

About the first version of tstl codes:

In the first version, I just tested three data structures: queue, stack and singly linked list. And I didn't find any bugs yet. I will test the sorting algorithms and others data structures in this library during the following work.
